Henderson Equine Castrating Instrument

Patented Design Manufactured and Distributed Exclusively by Stone.

29900

The Henderson Equine Castrating Instrument was developed from the original Henderson Cattle Castration Tool designed and introduced in 1994. The Henderson Equine Instrument design and procedure have been under development and tested by Stone and Veterinarians over the past four years. The Henderson Equine instrument and procedure has been used on thousands of horses with excellent results.

Benefits of using the Henderson Equine Instrument:

- Reduction of bleeding due to castration
- Reduction of post procedure swelling
- Saves time, substantial reduction in time to complete the procedure
- Stress reduction, reports from veterinarians indicate horses react extremely well post procedure

Product Features:

- New jaw design specifically developed for equine
- Removable bolt in pivot joint to enhance cleaning and sterilizing of the instrument.
- Constructed of highly polished, autoclavable, sterilizable material.

Product # 29900 – Henderson Equine Castrating Instrument with Informational

Hold drill and Henderson Instrument in a straight line with the cord.

Turn drill clockwise slowly for 4 to 5 turns. Speed can be increased after the initial turns.

After 20 to 25 turns, the tunic will fracture tying off the cord which dramatically reduces bleeding.

Quality Products that Work for You...

Quality comes first at Stone. We've been making handcrafted products for livestock producers since 1932. Over the years we've learned a great deal about quality. You can see it in the meticulous detail and workmanship of our products, and you can feel it in the way they perform.

We know you're only going to choose Stone products if they perform

to your complete satisfaction. Above all, we understand that our products must not only make your job safer, easier and more effective, they must also add to your bottom line.

We value quality and performance just as much as you do. The best way to appreciate the true quality of a Stone product is to experience it for yourself. We take pride in making products that work for you.

Mountain Man™ Equine Dental Assistant

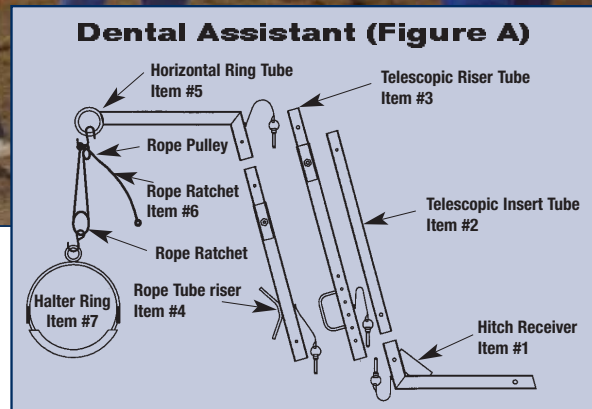

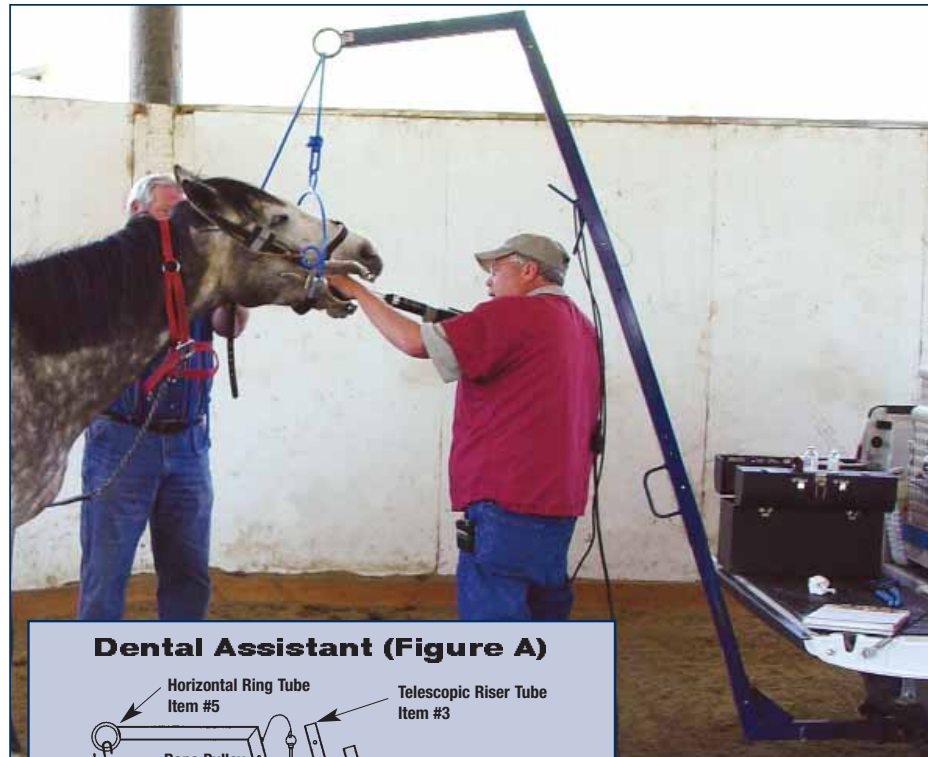

Equine Products

Mountain Man Equine Dental Assistant

Designed for restraining horses during dental procedures, x-ray and other applications. Heavy duty steel construction. Breaks down in sections for easy storage and transportation. Fits into class 2 or 3 receiver hitch. Design allows tailgate to be used as a working surface.

Product # 76000 – Mountain Man Equine Dental Assistant

Fast, easy set-up – (See Figure A above for reference to item #)

1. Insert Hitch Receiver Assembly (item #1) into class 2 or 3 hitch.

2. Connect Telescopic Insert Tube (item # 2) into Hitch Receiver Assembly (item #1).

3. Place Telescopic Riser Tube (item #3) over Telescopic Insert Tube (item # 2).

4. Now Connect Horizontal Ring Tube (item #5) to Rope Tube Riser (item #4). Once connected, place on Telescopic Riser Tube (Item #3).

5. Attach the rope ratchet assembly (item #6) to the top of the ring.
6. Adjust assembled unit to the appropriate height to perform the procedure.
